## Acerca de nosotros

A constellation consists of visible stars that form a perceived outline or pattern, usually representing an animal, a person or mythological creature, or an inanimate object.

The origins of the first constellations date back to prehistoric times.

Their purpose was to tell stories of their beliefs, experiences, creation, or mythology.

The recognition of constellations has changed over time. They varied in size or shape, others became popular and then were forgotten, and some were limited to a single culture.
